

Plant Scapes

Plant Scapes is a unique collaboration between some of the leading horticulturists in the country. It represents a first in terms of offering the opportunity to hire full size botanical displays to the corporate event industry.

Each of the nurseries offering their skill and expertise are regular exhibitors at the major flower shows across the country, and all have the accolade of having been awarded the prestigious Chelsea Flower Show gold medal. This is the highest display award a horticulturist can achieve and represents absolute botanical perfection.

We offer 8 nurseries, and 8 individual specialities-Bonsai, Orchids, Cacti, Japanese Maples, Ferns, Fynbos, Palms, and Carnivorous Plants.

As these are working nurseries, availability can be limited, and some specialities are seasonal, and therefore are limited in this respect.

Displays can be hired for a single day/evening event, or longer if required.

Mendip Bonsai Studio

We are the leading horticultural exhibitor for displaying bonsai, and have the accolade of being the only bonsai exhibitor to achieve best in show awards at the Royal Horticultural Society shows at Tatton Park in 2005, and Wisley in 2007. Currently we have over 35 RHS Gold Medals. Our displays boast some of the finest and oldest specimen bonsai in the country, and we lead the field in offering educational services including workshops, lectures, and demonstrations. Average display size 20 feet.

Burnham Nurseries

Burnham Nurseries Ltd are the well-known orchid specialists from Devon. The nursery, now in its third generation of the Rittershausen family, has the widest range of these fascinating and increasingly popular plants in the country and we are well-known for our Gold-Medal winning displays at the Royal Horticultural Society's Chelsea Flower Show and London Orchid Show. Our family have also written over 20 books on the subject of orchids and their cultivation. Average display size 20 feet.

Craig House Cacti

Proprietors Stan Griffin and Vicki Newman have an extensive range and knowledge of cacti and other succulents. Our displays include a selection of common and rare species. We have received many gold medals at major flower shows throughout the country including our first time at Chelsea in 2009. We also give talks and demonstrations to groups and societies etc. We offer a helpful and professional quality service. Average display size 15 feet.

Hippopottering.

Hippopottering Nursery is a family firm established for 30 years. We have been growing and exhibiting Japanese Maples for 25 years and have over 230 varieties of maples in our nursery making it the most comprehensive selection in the country. Our beautiful displays are marvelled by many as we stage our show gardens to look like a woodland of maples with a waterfall in the centre, often inspiring people to re-create a similar effect in their own gardens. We have received many RHS gold medals including Chelsea in 2000. Average display size 18 feet.

Fernatix

Over the last few years we have become the leading exhibitor of ferns in this country, and have been awarded over 65 Gold medals so far. We have displayed at nearly 40 Royal Horticultural Society shows and have had a clear run of Gold medals for our efforts, as well as a number of best in show awards including Malvern spring twice, Malvern Autumn once, and Wisley twice. We were Chelsea Gold Medalists in 2004, 2005, 2006, & 2007. Average display size 15 feet.

Churchtown Nursery

We are a small nursery situated in the far West of Cornwall specialising in an ever increasing range of South African plants, in particular Restio, Protea, and Erica (collectively known as Fynbos), as well as other indigenous Western Cape flora. We are regular gold medalists at all of the major Royal Horticultural Society shows, including Chelsea in 2007. Average display size 15 feet.

Ainsworth Displays

We are Britain's premier grower of hardy palm trees, and present a gold award display of palms which includes what is probably the only example of *Chamaerops humilis* 'stella' in Britain today. We are also possibly the only exhibitor in the world where you will find 4 different *Chamaerops* species and varieties on show. Our display includes other fascinating hardy species. We have been awarded countless gold awards for our plants, including Chelsea Gold medals in 2006, 2007, 2008, and 2009. Average display size 20 feet.

Hewitt-Cooper Carnivorous Plants.

We have been growing carnivorous plants for nearly 30 years, and have been exhibiting at major shows for a decade. Our display boasts an array of both common and rare specimens of these incredible plants, displayed in a natural setting. We have been awarded many gold medals, and best in show awards, and achieved Chelsea Gold Medals in 2008 and 2009. Average display size 15 feet.
